## ABSTRACT

Saudi Arabia's Vision 2030 seeks to modernize HR management, addressing inefficiencies in recruitment and employee management. ElpisHR, an AI-powered platform, automates CV sorting, chatbot interviews, and job postings, making hiring faster and more accurate. It also provides data-driven insights to enhance HR decision-making.

By integrating AI and automation, ElpisHR improves efficiency, streamlines recruitment, and supports organizations in achieving Vision 2030 goals.

**key words :** Machine Learning , OpenAI-GPT, HR Management .

## INTRODUCTION

ElpisHR is an AI-powered platform that streamlines recruitment with automated CV sorting, chatbot interviews, and data-driven analytics. It enhances efficiency, ensures unbiased hiring, by transforming HR processes through advanced automation.

## TOOLS

## HOW IT WROK

## CONCULOSIN

ElpisHR enhances HR management efficiency through AI-driven automation. We used cosine similarity for unbiased resume ranking and NLP models for AI-driven interview analysis. OpenAI's GPT model powers the chatbot, generating automated interview summaries. These innovations streamline recruitment and ensure fair hiring.

## INTERFACES

HR interfase

## OBJECTIVE

## METHODOLOGY

## RESULTS

## FUTURE WORK

- **AI Employee Insights** – Performance analysis with personalized training recommendations.
- **Third-Party Integration** – Seamless connectivity with external HR systems.
- **AI Interviews Upgrade** – Interactive visual and voice-based candidate assessments.
